

## Driving Simulators

<b>Area:</b>	Structure and control of driving simulators
<b>Person in charge:</b>	Benjamin Hesse, Gregor Hiesgen
<b>Duration:</b>	2008 – 2009

The goal is to involve the driver in the development of driver assistance systems at an early stage. The tuning of the parameters with respect to the Human Machine Interface is also a focus of this project. Challenges involve the realisation of a realistic driving feeling with the optimum hard- and software required.
