NEWS HIGHLIGHTS	NEWS HIGHLIGHTS Making Science The Star
2020	
2019	ICTP alumnus success in science and science communication
2018	22/06/2017 - Trieste
2017	ICTP sometimes hosts science celebrities and distinguished guests, with all due ceremony, but it's rare and exciting when that celebrity is also an ICTP alumni. That happened recently when Cameroonian scientist, science communicator, and television personality Stephane Kenmoe returned to ICTP for a conference, to meet with old advisors, and to humbly enjoy the enthusiasm of fellow scientists who recognized him for his science outreach efforts. Kenmoe graduated from ICTP's Postgraduate Diploma Programme in 2011, went on to earn his PhD at the Max Planck Institute for Iron Research,

Stephane Kenmoe is a researcher and TV science expert from Cameroon. He now works as a physicist in Germany, where he got his PhD.

"I'm also a science communicator," he says. "I want to boost the scientific culture in Cameroon, where people aren't very enthusiastic about science.

Promoting Science in Cameroon

UISBURG SSEN

Dr. Stéphane Kenmoe has been working as a postdoctoral researcher at the Chair of Theoretical Chemistry at the University of Duisburg-Essen for three years. Born in 1984 in Cameroon, he is actively involved in promoting African early career researchers and building networks. In his home country, he is known for TV appear ances in which he explains scientific phenomena in a generally understandable and humorous way. In November, Kenmoe, who lives in Duisburg, will again travel to Cameroon and head the 1st Central African School on Electronic Structure Methods a

Kenmoe's current research project at the University of Duisburg-Essen is part of the Collaborative Research Centre (CRC) Heterogeneous Oxidation Catalysis in the Liquid Phase of the University of Duisburg-Essen and Ruhr-Universität Bochum, funded by the German

cultural leaders and politicians

to discuss the necessity of

funding research locally
