SCITRA

SCIENCETRANSFER
in Cooperation with Industry

SCITRA, a project of the Science Support Centre (SSC) of the University of Duisburg-Essen, establishes cooperations between science and industry. With SCITRA the already successful research transfer will be further enlarged to make the findings of university research more readily available to companies in industry. Here at MEDICA, two of our scientists are presenting their research as examples of what the University has to offer in interdisciplinary fields of biology, chemistry, medicine and technology.

SCIENCE

INDUSTRY

Theoretical knowledge
Latest expertise
Lab capacity
Methodology
Graduates
Accredited laboratories

Implementation skills
Market knowledge
Product marketing
Business administration
Career opportunities
Financial resources

SCITRA offers:

- Business start-ups
- Combining skills
- Patent exploitation
- Contract analysis and reports
