ZMB

Centre for Medical Biotechnology

The **ZMB** is an interdisciplinary scientific centre of the University Duisburg-Essen, integrating medical research at the University Hospital and the natural sciences at the Campus. The mission of the ZMB is to elucidate molecular mechanisms of disease and to turn this knowledge into medical progress. Currently, the 55 groups of the ZMB are active in key areas of basic biomedical research, i.e. Oncology, Immunology, Infectious Diseases and Transplantation, Genetics, Developmental, Molecular and Cell Biology as well as in Biomolecular Structure and Function. In addition, the ZMB is involved in educating students in the BSc/MSc programme Medical Biology and in various structured PhD programmes.

Research Programmes:

- Oncology
- Immunology, Infectious Diseases and Transplantation
- Genetics, Developmental, Molecular and Cell Biology
- Biomolecular Structure and Function
