Preface to the first edition vii
Preface to the fourth edition ix

Introduction 1

1 The great automatic grammatisator 6
   Need anything be innate?

2 Animals that try to talk 23
   Is language restricted to humans?

3 Grandmama’s teeth 47
   Is there biological evidence for innate language capacity?

4 Predestinate grooves 66
   Is there a pre-ordained language ‘programme’?

5 A blueprint in the brain? 91
   Could any grammatical information conceivably be innate?

6 Chattering children 110
   Are children following ‘rules’ when they learn to speak?

7 Puzzling it out 135
   Exactly how do children learn language?

8 Celestial unintelligibility 165
   Why do linguists propose such bizarre grammars?
CONTENTS

9 The white elephant problem
   Do we need a grammar in order to speak? 183

10 The case of the missing fingerprint
    How do we understand speech? 199

11 The Cheshire Cat’s grin
    How do we plan and produce speech? 237

12 Banker’s clerk or hippopotamus?
    The future 260

Part 1 Puzzles

1 A natural curiosity: How did language begin? 3
2 A peculiar habit: What is language for? 16
3 The bother at Babel: Why do languages differ so much? 26
4 Distinct duties: Is language an independent skill? 38

Part 2 Origin

5 The family tree: The evolutionary background 49
6 A devious mind: The basic requirements 65
7 Broken air: Inherited ingredients 77
8 Small beginnings: First steps 93
Part 3 Evolution

9 The second word: The emergence of rules 107
10 The tower of speech: Expansion 123
11 Time travelling: Extra attachments 135
12 Rebuilding on the high seas: Keeping going 148

Part 4 Diffusion

13 The widening circle: Moving outwards 161
14 The hidden core: The hunt for universals 175
15 The real magician: Ruling the rules 187
16 Unweaving the rainbow: Separating the strands 201
17 The endless stair: Past and future 212

**Part III: Cognitive approaches to grammatical form**

9 From idioms to construction grammar  
9.1 Introduction  
9.2 The problem of idioms  
9.3 Idioms as constructions  
9.4 From constructions to construction grammar

10 An overview of construction grammars  
10.1 Essentials of construction grammar theories  
10.1.1 Grammatical representation: the anatomy of a construction  
10.1.2 The organization of constructional knowledge  
10.2 Some current theories of construction grammar  
10.2.1 Construction Grammar (Fillmore, Kay et al.)  
10.2.2 Lakoff (1987) and Goldberg (1995)  
10.2.3 Cognitive Grammar as a construction grammar  
10.2.4 Radical Construction Grammar  
10.3 Conclusion

11 The usage-based model  
11.1 Grammatical representation and process  
11.2 The usage-based model in morphology  
11.2.1 Entrenchment and representation of word forms  
11.2.2 Regularity, productivity and default status  
11.2.3 Product-oriented schemas  
11.2.4 Network organization of word forms  
11.2.5 Conclusion  
11.3 The usage-based model in syntax  
11.3.1 Typeshift frequency, productivity and entrenchment  
11.3.2 Product-oriented syntactic schemas
