Exhibitors at analytica Vietnam 2013

International gathering for the analysis and laboratory technology industry

analytica Vietnam, a spin-off exhibition from the world's leading trade fair analytica in Munich, opens its doors for the 3rd time from April 17 - 19, 2013 at SECC – Saigon Exhibition & Convention Centre in Ho Chi Minh City. More than 100 exhibitors from all around the world will be presenting their latest developments for the analysis, laboratory technology and biotechnology sectors.

Don't miss the opportunity to use this outstanding platform for enhancing your contacts and business.

All exhibition sectors at a glance

Analysis

- Equipment for instrumental analysis
- Chromatography
- Spectroscopes
- Microscopy and optical image processing

Measuring and testing/ Quality control

- Industrial quality control
- Material testing
- Characterization and properties of materials
- Quality control in pharmacology and industry

Laboratory technology

- Laboratory equipment and machines
- Laboratory data systems and documentation
- Laboratory apparatus
- Chemicals, reagents and consumables

Life sciences and biotechnology

- Bio-analysis, bio-chemicals, bio-informatics
- Laboratory technology for biotech and life sciences
- Medicine and diagnostics

analytica Vietnam conference

The analytica Vietnam conference will be taking place from April 17 – 18, 2013, at the conference hall on the first floor, SECC.

Leading national and international experts will be presenting their latest research results and developments. The chairmen of the conference are Professor Dr. Dr. h.c. A. Kettrup (Techn. University Munich, Dept. of Ecological Chemistry) and Professor Dr. Pham Hung Viet (Director of Research Centre for Environmental Technology and Sustainable Development (CETASD) at the Hanoi University of Science, Vietnam National University). The Vietnam Analytical Sciences Society (VASS) is the patron organization for this event and Ho Chi Minh City University of Industry (HUI) is its official support body. Knowledge transfer and direct communication for the entire period of analytica Vietnam are guaranteed by the accompanying conference.

The analytica Vietnam conference focuses on current developments in the following areas:

- Analytical quality assurance/ Fundamentals
- Environmental analysis
- Food safety/ Food analysis/ Pharmaceuticals
- Chromatography/ Mass spectrometry.

Borosil

The most Trusted & Reliable brand in Laboratory Glassware

Borosil offers a wide range of Laboratory Glassware
manufactured from **Low Expansion 3.3 Borosilicate Glass**

CELEBRATING

50
years
1964-2014

Pioneers in speciality glass

Borosil **A100** ± 0.1 in 27°C
ml 14/15 15/19

Proper Annealing

- * Stress free glassware
- * Better mechanical strength

Automatic state of the art calibration process

- * Individually calibrated
and certified products

Borosil Glass Works Ltd., Mumbai, India.

analytica Vietnam conference program

April 17, 2013

| TIME | TOPIC | SPEAKER |
|----------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------|
| April 17, Session I: Analytical Quality Assurance/ Fundamentals Chaired by Prof. Pham Hung Viet and Prof. Antonius Kettrup | | |
| 07.30 - 10.00 | Registration, Welcome speeches, Coffee break | |
| 10.00 - 10.30 | Quality assurance and compliance in laboratories | Dr. Ludwig Huber, Labcompliance Ltd, Oberkirch, Germany |
| 10.30 - 11.00 | Application of green sample preparation techniques for the isolation, preconcentration and gas chromatographic determination of organic environmental pollutants | Prof. Dr. J. Namiesnik, Gdansk University of Technology, Gdansk, Poland |
| 11.00 - 11.30 | Methylmercury analysis in sediment samples using home-coupled gas chromatography – atomic fluorescence detector system | Dr. Nguyen Van Dong, VNU University of Science, Hochiminh, Vietnam |
| 11.30 - 12.00 | Advanced compositional analysis using thermal analysis techniques coupled with “state-of-the-art” gas analysis systems | Dr. J. Blumm, Netzsch-Geraetebau mbH, Selb, Germany |
| 12.00 - 13.15 | Lunch | |
| April 17, Session II: Environmental Analysis/ Environmental Study Chaired by Prof. Jacek Namiesnik and Assoc.Prof. Le Van Tan | | |
| 13.15 - 13.40 | Personal exposure to benzene of selected population groups and impact of commuting modes in Ho Chi Minh | Tran Thi Ngoc Lan, University of Science, VNU HCM, Vietnam |
| 13.40 - 14.05 | Effect-directed analysis of polycyclic aromatic hydrocarbons (PAHs) in road dust collected from Hanoi-Vietnam | Prof.Dr. Pham Hung Viet, CETASD, VNU University of Science, Vietnam |
| 14.05 - 14.30 | Environmental assessment of Dioxin contamination and transport in Bien Hoa Airbase | Dr. Nguyen Hung Minh, Dioxin lab, VEA , Vietnam |
| 14.30 - 14.55 | Manganese contamination in tube well water and human toxication risk in the Red River Delta | Pham Thi Kim Trang, CETASD, VNU University of Science, Vietnam |
| 14.55 - 15.20 | Coffee break | |
| April 17, Session II: Environmental Analysis (cont.) Chaired by Dr. Juergen Blumm and Nguyen Hung Minh | | |
| 15.20 - 15.45 | Accumulation assessment of heavy metals in fish and sediment of natural ponds in Ha Nam and Vinh Phuc provinces | Assoc.Prof.Dr. Nguyen Thi Ha, Faculty of Environmental Sciences, VNU University of Science, Ho Chi Minh, Vietnam |
| 15.45 - 16.10 | Simultaneous Determination of Methyl Diselenite, Selen Methioline, Selenite, Selenate in Shrimps, Fishes Collected in Some Aquaculture Ponds at Phap Van - Thanh Tri – Hanoi | Assoc.Prof.Dr. Ta Thi Thao, Faculty of Chemistry, VNU University of Science, Hochiminh, Vietnam |
| 16.10 - 16.35 | Quantitative determination of Bromide and Iodide in biosamples using ICP-MS | Nguyen Thi Kim Dung, Institute for Technology of Radioactive and Rare Elements, Vietnam |
| 16.35 - 17.00 | Photocatalytic degradation of some pesticides under simulated solar radiation | Prof. Dr. P. Sutthivaiyakit: Dept.of Chemistry, Kasetsart University, Bangkok, Thailand |

analytica Vietnam conference program

April 18, 2013

| TIME | TOPIC | SPEAKER |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------|
| April 18, Session III: Separation Sciences / Mass Spectrometry Chaired by Prof. Pakawadee Sutthivaiyakit and Assoc.Prof. Ta Thi Thao | | |
| 8.15 - 8.40 | Application and characterisation of chemically modified surfaces in chromatographic determination of biologically important compounds | Prof. Dr. B. Buszewski, Dept. Environm. Chemistry and Bioanalytics, University of Torun, Poland |
| 8.40 - 9.05 | Strategy for Minimizing Between-Study Variation of Large-Scale Phenotypic Experiments Using Multivariate Analysis | Dr. Lorenz Gerber, Umeå Plant Science Centre, Swedish University of Agricultural Sciences |
| 9.05 - 9.30 | Rapid identification of microorganisms by MALDI-TOF Mass Spectrometry with SAMARIS database | Dr. Z. Zhan, Shimadzu Ltd., CSC Asia Pacific, Singapore |
| 9.30 - 9.55 | The analytical workflow for pesticides analysis in food using Triple Quadrupole Mass Spectrometry | Dr. H.-J. Huebschmann, Thermo Fisher Scientific Ltd., Singapore |
| 9.55 - 10.20 | Coffee break | |
| April 18, Session III: Separation Sciences / Mass Spectrometry (cont.) Chaired by Boguslaw Buszewski and Assoc.Prof. Nguyen Thi Anh Mai | | |
| 10.20 - 10.45 | Current trends in clean-up of body fluids for LC-MS/MS analysis of small molecules | Prof. Dr. K.S. Boos, Medical Center, University Munich, Germany |
| 10.45 - 11.10 | Effect of electrolytes in mobile phase on the retention power and separation efficiency of Zwitterionic Zic-hilic stationary phase – Application to analysis of organic acids and carbohydrates in foodstuff | Ms. Nguyen Thi Thuy Luyen, Department of Chemistry, VNU University of Science, Hochiminh, Vietnam |
| 11.10 - 11.35 | Reviewing the potential of powerful and scalable UHPLC solutions for the characterization of bio-therapeutic products | PD Dr. F. Steiner, Thermo Fisher Scientific Ltd., Germering, Germany |
| 11.35 - 11.55 | Applications of ion-exchange/ reversed-phase mixed-mode stationary phase in combination with charged aerosol detection of separating pharmaceuticals | PD Dr. J. Weiss, Thermo Fisher Scientific Ltd., Idstein, Germany |
| 12.00 - 13.15 | Lunch | |
| April 18, Session IV: Food Safety/ Food Analysis/ Pharmaceuticals Chaired by Prof.O.Schmitz and Dr. Nguyen Thi Thanh Mai | | |
| 13.15 - 13.40 | Study on Tyrosinase inhibitory activity of Vietnamese medicinal plants | Dr. Nguyen Thi Thanh Mai, VNU, Hochiminh Vietnam |
| 13.40 - 14.05 | Metabolomics in the pre-diabetes research | Dr. M. Lucio: Helmholtz-Zentrum Muenchen, Germany |
| 14.05 - 14.30 | Genotoxic impurities in herbal medicinal products | Dr. G. Tittel, Dronania Pharmaceuticals Ltd., Bad Woerishofen, Germany |
| 14.30 - 14.55 | Identification of biomarkers and quality control of Chinese Herbal Medicine with comprehensive two-dimensional chromatography and DIP-APCI-MS | Prof. Dr. O. Schmitz, Dept. Applied Anal. Chemistry, University Duisburg-Essen, Germany |
| 14.55 - 15.20 | Coffee break + Poster Session | |
| April 18, Session IV: Food Safety/ Food Analysis/ Pharmaceuticals (cont.) Chaired by Prof. O. Schmitz and Dr. Nguyen Thi Thanh Mai | | |
| 15.20 - 15.45 | The workflow from screening to confirmation analysis for dioxins and dl-PCB's in food | Dr. H.-J. Huebschmann, Thermo Fisher Scientific Ltd., Singapore |
| 15.45 - 16.10 | Study on phase distribution and recover of aroma compound γ -decalactone produced by <i>Yarrowia lipolytica</i> from the culture broth | Assoc.Prof.Dr. Nguyen Thi Hoai Tram, Food Industries Research Institute (FIRI), Vietnam |
| 16.10 - 16.35 | Determination of total antimony and search to determinate inorganic antimony, two oxidation states, Sb(III) and Sb(V) in some food by hydride generation atomic absorption spectrometry HG-AAS | Dr. Nguyen Thi Dieu Hong, CASE Hochimin, Vietnam |
| 16.35 - 16.55 | Gold nanoparticles incorporated molecularly imprinted over-oxidized polypyrrole modified glassy carbon electrode for sensitive and selective determination of dopamine | Dr. Do Phuc Quan, CETASD, VNU University of Science, Hochiminh, Vietnam |
| 16.55 - 17.15 | Design of label-free graphene-polyaniline based electrochemical immunosensor for herbicide atrazine determination | Assoc.Prof.Dr. Tran Dai Lam, Hanoi University of Technology (HUT), Hanoi, Vietnam |
| 17.15 - 17.30 | Closing remarks by Prof. Pham Hung Viet and Prof. Antonius Kettrup | |

Tutorial: Coupling of Solid Phase Extraction (SPE) with HPLC

Speaker : Prof. Dr. Karl-Siegfried Boos

Date : April 17, 2013

Time : 9.00 – 12.00

Venue : SECC, conference room 4

Attendance : Free of charge

The tutorial, arranged by Prof. Dr. Karl-Siegfried Boos from the Medical Centre of the University of Munich, is intended for analytical chemists, graduated students and technicians in the pharmaceutical, toxicological, environmental and clinical setting.

Tutorial outline:

- Integration and automation of highly selective clean up of complex (bio) fluids (e.g. whole blood, plasma, urine,) using SPE and column switching (SPE-LC).
- Instrumentation, operational procedures and practical guidelines for hyphenation of SPE - LC with UV, ECD and/or MS/MS.
- Properties and performance of tailor-made SPE packing materials (e.g., restricted access materials, RAM; mixed-mode polymers, MMP).
- General introduction to monitoring and elimination of ion suppression / matrix effects in bioanalytical LC-MS/MS.
- MS adequate processing of body fluids by means of on-line SPE-(LC).
- Multidimensional SPE

Workshop: Equipment qualification and system validation in regulated laboratories

Speaker : Dr. Ludwig Huber

Date : 18 April, 2013

Time : 9.00 – 17.00

Venue : SECC, conference room 4

Attendance : USD 70 per person to be paid in advance or on site, online pre-registration required (www.analyticavietnam.com)

The workshop which will be held by Dr. Ludwig Huber from Labcompliance Ltd. Germany is intended for senior analysts and the laboratory management of pharmaceutical, chemical and food testing laboratories. The workshop will give attendees the background enabling them to understand the requirements and to focus on strategies in accordance with FDA/EU, ICH, PIC/S, USP and ISO 17025 regulations.

Workshop: Technology exchange and related supporting activities

Date : April 19, 2013

Time : 8.30 – 12.00

Venue : SECC, conference room

Attendance : Free of charge

The workshop is organized by NASATI - National Agency for Scientific and Technological Information. The main objectives of the workshop are to raise the awareness of accreditation activities in Vietnam and to distribute the necessary information concerning the government support available to all people for developing scientific and technological research, production and business. The workshop is aimed at the representatives of institutes, universities, R&D centres and laboratories, DOST, enterprises and the press.

Time Schedule Exhibitor Forum

On April 17 and 18, 2013, exhibitors at analytica Vietnam will be displaying their latest products and innovations by way of a presentation at the Exhibitor Forum.

Preliminary program, further speeches are expected:

17 April 2013, 13.30 – 17.00

| TIME | COMPANY | SPEAKER | TOPIC |
|---------------|------------------------------------|------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 13.30 - 14.00 | CDS Analytical | Gary Deger | Programmed Pyrolysis-GCMS. The ONLY injection technique you need to characterize complex polymeric samples. Say Good-Bye to solvent extraction and headspace! |
| 14.00 - 14.30 | Fisher Instrumentation(s) Pte. Ltd | Conner Wong | "- X Ray XAN benefit for strictly monitoring gold quality - Testing result of Vietnamese gold on XAN system - Application in electric / electronic plating of XDLM system - Thickness and material analysis by XDLM 237" |
| 14.30 - 15.00 | PS Analytical SE Asia | Tim Williams | Atomic Fluorescence Spectrometry. Recent Advances in Analysis & Applications |
| 15.00 - 15.30 | Buchi Labortechnik AG | Nattakarn Navasearttavisootr | Buchi Analytic Solution for Food and Environment Industrie |
| 15.30 - 16.00 | Celsis / DKSH | Scott Scobris | Rapid Microbial Methods |
| 16.00 - 16.30 | R-Biopharm | Ronald Niemeyer | Quality Assurance aspects of mycotoxin testing |
| 16.30 - 17.00 | behr Labor-Technik GmbH | Jürgen Behr | Extraction |

18 April 2013, 13.30 – 17.00

| TIME | COMPANY | SPEAKER | TOPIC |
|---------------|-----------------------------|-----------------------|-------------------------------------------------------------------------------------------------------|
| 13.30 - 14.00 | behr Labor-Technik GmbH | Jürgen Behr | Kjeldahl determination |
| 14.00 - 14.30 | R-Biopharm | Ronald Niemeyer | A HACCP based approach for mycotoxin management using lateral flow tests |
| 14.30 - 15.00 | LGC Standards | Dr. Ulrich E. Hackler | The 3 Pillars of Analytical Quality Assurance |
| 15.00 - 15.30 | Pharma-Test | Frank Fähler | Tablet Dissolution Testing - Solutions available by Pharma Test |
| 15.30 - 16.00 | Agilent | t.b.c. | t.b.c. |
| 16.00 - 16.30 | Oxford Instruments Pte. Ltd | Dr. Kip Goi | EBSD/EDS characterisation of a ballpoint pen |
| 16.30 - 17.00 | Agilent | Dr. Yu Bin | An essential Roadmap to gas Phase Mass Spectrometry Portfolio for food and environmental Applications |

Thermo
SCIENTIFIC

Innovation Applied

Connect. Collaborate. Solve.

TSQ 8000 Triple Quadrupole GC-MS/MS

The Thermo Scientific* TSQ 8000 Triple Quadrupole GC-MS System enables more precise routine analyses, saving time and reducing costs in the laboratory. The TSQ 8000 Triple Quadrupole GC-MS System offers unstoppable productivity with uncompromised MS/MS simplicity.

Hệ thống sắc ký khí khối phổ ba tứ cực nối tiếp TSQ 8000 tạo ra các phép phân tích thông thường chính xác hơn, tiết kiệm thời gian và giảm giá thành cho phòng thí nghiệm. Thiết bị có khả năng làm việc không ngừng và sử dụng chế độ MS/MS vô cùng đơn giản.

TSQ Quantum Ultra Triple Stage Quadrupole Mass Spectrometer

Thermo Scientific* TSQ Quantum Ultra mass spectrometer provides ultimate productivity for bioanalytical analysis. Faster method development at the highest possible specificity is routinely achievable with the TSQ Quantum Ultra mass spectrometer.

Hệ thống sắc ký lỏng khối phổ ba tứ cực nối tiếp TSQ Quantum Ultra cung cấp khả năng làm việc tối đa đối với các mẫu sinh học. Phát triển phương pháp nhanh hơn ở độ chọn lọc cao nhất hiện có dễ dàng đạt được trên thiết bị này.

iCAP Q ICP-MS

The Thermo Scientific* iCAP Q ICP-MS is a dramatically different ICP- for total reliability with maximized up-time and a dramatically simplified workow. he radical design simplifies the user experience and dramatic improves laboratory efficiency.

iCAP-Q là hệ thống khối phổ ghép nối nguồn plasma rất khác biệt cho độ tin cậy cao để tối đa thời gian máy hoạt động và đơn giản hóa các chu trình làm việc. Thiết kế tứ cực thẳng đứng giúp đơn giản hóa việc sử dụng của người vận hành và cải thiện hiệu quả phòng thí nghiệm.

New product release at analytica Vietnam

Andreas Hettich

Booth Number: E05

Good reasons to choose a Hett Cube: Wide range of uses:

Microbiological studies in

- Hospitals and healthcare facilities
- Universities and research laboratories
- Biotechnology and pharmaceutical industry
- Food and beverage industry
- Water analysis
- Cosmetics and chemical industry

Excellent eco-balance

Easy Operation

Tested Quality

Intelligent temperature control

Low footprint/ maximum usable space

Excellent price-/ performance ratio

Reduces impact on environment and running costs

Creates pleasant working conditions

Provides security and long service life

Minimizes the danger of drying out, delivers reproducible results

Saves space and time

Spares your budget

WERKSITZ

Booth Number: C10

The german WERKSITZ company—manufacturer of ergonomic work chairs, laboratory chairs, wetroom chairs, stools, standing supports, special solutions and ergonomic floormats presents their high developed chair WS 1220 E with a flexible armrest - 012 B for a pleasant and rapid blood with drawal. These modern chairs combine a high-quality design with improved hygiene at work. They are especially suitable in hospitals and medical practice. Our models have been tested by the IPA Fraunhofer Institute and they fulfil the requirements of clean room class 5 according to DIN ISO 14644-1.

WERKSITZ – Quality made in Germany!

HP 350 with metal membrane

Areas of application: Pressure regulation for high flow rates, especially for gases of high-purity up to 6.0 -available in brass matt-chromed or stainless steel.

Special features:

- Pressure regulator for high-purity gases with high flow rates. Specifications: inlet pressure max. 300 bar, outlet pressure max. 50 bar with 1/4" connection.
- Convenient control mode
- Latest construction and design: internally developed
- Highest component quality: with aluminium handwheel
- State-of-the-art materials: similar materials are used in space- and aviation applications
- In-house manufacturing: all components are produced, mounted and proved at our location in Germany

www.hornung.org

Produkt 1: Premi@Test

Premi@Test is a microbial inhibition test and offers a simple and cost-effective qualitative screening for a broad spectrum of antibiotics in meat, fish, shrimps, eggs and other food commodities. In contrast to conventional plate tests, reliable results are available in less than 4 hours. The easy to use test enables on-site screening by farmers, fishers, slaughterhouses and in processing industry.

Produkt 2: RIDA* QUICK SCAN

RIDA* QUICK SCAN, a reading device especially developed for the RIDA* QUICK Test product line, can be used to read out the QUICK tests results. RIDA* QUICK Tests are available for Aflatoxin, DON, Fumonisin and Zearalenone.

The reading device performs a quantitative analysis, these data can be printed or exported to a PC. This permits objective analyses and ensures safe and reliable documentation of the results. The RIDA* QUICK SCAN system, complete with reader and portable printer, can be set up as a stationary unit in the laboratory or used as a portable battery-operated unit outside the lab.

Visitor online registration – spend less time waiting*

1. Register in advance at: www.analyticavietnam.com.vn
2. When you arrive at the exhibition centre, you can easily pick up your badge and free show catalog at the pre-registration counter, without queuing.

Another way to register as visitor for analytica Vietnam is by using the detachable pre-registration card enclosed. Just complete the pre-registration form and send it back to us. Your badge will be deposited for collection at the pre-registration counter at SECC.

*Admission is free of charge, upon registration.

Visitor target groups

- Chemicals & petrochemicals
- Electronics & electrical engineering
- Pharmaceuticals industry
- Industrial research & development
- Medical & diagnostics industry
- Public-sector research & development
- Environmental protection
- Public authorities/public facilities/universities

analytica worldwide – A global exhibition network

analytica Vietnam 2013, HCM City, April 17 – 19, 2013

analytica Anacon India 2013, November 12 – 14, 2013

analytica 2014, Munich, April 1 – 4, 2014
