

Application form for Autumn School “Biomolecular Structure and Function – Computational Approaches”

First name, family name	
Home address (street, city, zip-code, country)	
Institute address (name of institute, street, city, zip-code, country)	
Email address	
University degree (i.e. Biochemistry MSc, Bioinformatics BSc, etc)	
Current studies (i.e. master Biochemistry, PhD Bioinformatics, etc)	
Master or PhD supervisor (Name, full institute address, Email, phone)	

In which way would you use computational modelling and simulation of biomolecular systems in your research? Give at least one concrete example!

Would you focus in your future research on computational methods, would you combine experimental and computational approaches, or do you plan to work mainly experimentally?

Please remember to include a short letter of reference by your supervisor. Send everything to one of the contact addresses.
