## VET 2035

### Workshop-Programme

Green and Digital Transition  
in the Construction Sector

EUROPEAN **VOCATIONAL  
SKILLS WEEK** 2020

## Description of the event

Disruptive technologies, new business models and changed work processes are some of the drivers that are currently massively changing the construction industry resulting in far-reaching transformation processes in VET. The aim of the two-day online event is to assess the developments in the construction sector and designing roadmaps for VET in a selected panel of European experts focussed to the fields of technology, economy, society, politics and vocational training. We will come together and exchange ideas in an exclusive group. Get an insight into future developments and help shape the future of VET in construction. [Apply now](#) and become an expert in the "[Foresight Workshop VET 2035](#)". After registration we will send you additional material for your preparation.
