

NAME: _____

BIOME Seminar – Infectious Diseases
WS 2026_27
Monday, MFZ Seminar room 0.019 (ground floor); 17:00 s.t.

Date	Chairperson	Name	Topic	Signature
12.10.2026	Yu, Yue	Kruppa, Annika	Identification and characterization of interferon γ -stimulated effector proteins and interferon γ -repressed dependency factors limiting virus replication	Kathrin Sutter
		Yang, Caini	HBsAg-related molecular mechanisms of hepatocarcinogenesis in the transgenic mouse model of the hepatitis B virus - sex and age	
26.10.2026	Sridhar, Vaasudevan	Busskamp Castro, Paula	Contribution of envelope glycan diversity to antiviral immune escape of the human immunodeficiency virus	Mirko Trilling
		Breuer, Charlotte	uDKK3 as a biomarker of chronic kidney disease in the sylvatic setting of the Taï National Park, Côte d'Ivoire	
23.11.2026	Zydek, Isabel	Allerchen, Lea	Multimodal preclinical imaging of <i>Aspergillus fumigatus</i> invasion and treatment	Ruth Bröring
		Dluzak, Tina	Host-pathogen interactions in hantavirus infections: A focus on cytoskeleton crosstalk	
07.12.2026	Cheng, Bin	Jürgens, Leandra	Influence of the rat cytomegalovirus vXCL1 on the antigen cross-presentation of dendritic cells	Daniel Engel
		Mohanarangan, Muhila	The impact of virus-producing cell types on the spread and neutralization sensitivity of HIV swarms	
11.01.2027	Yang, Caini	Cheng, Bin	Regulation of HBV infection by intracellular immune and metabolic pathways modulated through glycosylation modifications	Ruth Bröring
		Long, Yun	Analysis of the effects of sphingosine on <i>Staphylococcus aureus</i> and <i>Pseudomonas aeruginosa</i>	
25.01.2027	Allerchen, Lea	Belbaisi, Abdallah	Characterizing C-type lectin-like protein of rat cytomegalovirus	Daniel Engel
		N.N.	t.b.a
