

To display the PDF as an interactive, fillable form, please change the settings as described:

For Firefox-users: Go to Settings – Applications – Search – PDF and choose “Adobe Acrobat in Firefox”. Say “OK” and reload the page or restart the browser. If you don’t already have Acrobat Reader, please note that you have to install it from the Adobe.com website.

For IE-users: Please use only the 32 bit Version of your browser! The 64 bit version won’t work. And you definitely need to have an installed version of Acrobat Reader.
