Call for Participation

It is our pleasure to announce the 3rd IEEE African Winter School on Information Theory and Communications with the theme: Digital Innovation, to be held at Mount Amanzi, Hartbeespoort from 27 to 29 August, 2019.

Internationally acclaimed researchers in Information Theory and Communications will be invited to present seminars.

This event will be held to stimulate interest in Information Theory and Communications amongst young academics and researchers as well as to increase co-operation and knowledge sharing between leading international researchers, African students and universities.

All international researchers as well as study leaders, doctoral and master's students and young staff members from Africa and other continents are encouraged to participate in order to establish more high-level of co-operation between African universities and international researchers.

Students are welcome to make presentations irrespective of the phase of their research. All submitted abstracts will be scrutinized by the publication chair along with the organising committee for suitability. The number of topics will not be limited and we hope to have a wide range of presentations in the Information Theory and Communications field.

Important Dates

If you would like to participate in this event, please send a short one-page paper (using the IEEE 2-column template) of your work-in-progress to tshongwe@uj.ac.za by 30 June 2019. Notification of acceptance will be on or before 15 July 2019.

Speakers

Invited Speakers confirmed to date include:

- Han Vinck, University of Duisburg-Essen, Germany
- Kees Immink, Turing Machines, The Netherlands
- Jos Weber, Delft University, The Netherlands
