

University Hospital Essen Institute for Experimental Immunology and Imaging	Skin protection plan for the laboratories of the genetic engineering S2 facility of IMCES (Medizinisches Forschungszentrum, 1. OG: 1.034–1.039, 3. OG: 3.027–3.035, 3.050)	Created by: Dr. Mike Hasenberg (04.09.2025) Translation: Jan-Hagen Krohn (12.11.2025) <i>Number of pages: 1</i>
--	--	---

DO WHAT	WHEN	USE WHAT	HOW	WHO
Protection when working with hazardous material or animals	Before beginning work <i>Do not wear gloves for more than 2 hours continuously and at most 4 hours total per day. Wearing under-gloves made from cotton is recommended.</i>	Single-use gloves made from nitrile or neoprene Use a glove type that suits the hazard.	Wear	Everyone
Protection from thermal hazard	Before beginning work	Protective gloves Heat- or cold-protective gloves	Wear	Everyone
Hand disinfection	After (temporary) stop of work, before leaving the lab	desmanol® care 1 Dispenser stroke (= 3 ml)	Rub onto dry hands until dry, at least 30 s	Everyone
	After work with viruses, before leaving the lab			
Skin disinfection	After acute contamination of open wounds with active biological material, or after opening of fresh wounds	Sterillium® Virugard® 1 Dispenser stroke (= 3 ml)		
Washing hands	After hand disinfection	Baktolin® sensitive Flüssigseife aus Spender	wash, optional	everyone
Skin care	After hand disinfection and/or cleaning, as needed	Stokoderm® Skin care product from tube	Rub onto skin, optional	everyone
