

What: ForBild Kick Off Workshop

When: December 20th, 2021

Where: Online via Zoom

All members of the University of Duisburg-Essen who are interested in educational research either in formal, informal or workplace learning in the context of ForBild (Education in the digital World) are welcome to join our communication forum.

As a discussion theme for this Kick off workshop, we have selected the topic
Digital Era Literacies for the LifeLong Learner.

We want to tackle hot and timely topics related to the skills and competencies necessary for Lifelong Learning in (and after) the 21st-century. Our goal is to connect with our participants with focus on generating ideas, future research directions and common interests.

Timeline

10:00	Opening and Welcome
10:15	Presentation of common goals ForBild
10:45	Follow up discussion with participants
11:00	Coffee-break & Stretching
11:15	Academic speed dating
12:15	Lunch
13:15	Workgroup 1: Learning Analytics for Collaborative Contexts
14:30	Workgroup 2: Merging Informal and Formal Learning Contexts
15:45	Next steps and Closing (16:00)

For more information on the academic speed dating and the working groups, turn to the next page.

Please register using the following form:

https://www.uni-due.de/izfb/registration_forbild

We will provide you with the Zoom-Link one week prior to the start of the workshop. Should there be any questions regarding the workshop, or its initiators feel free to contact us via mail: david.wiesche@uni-due.de

We are looking forward to get in touch with you. Kindly yours

Eva Gredel, Irene-Angelica Chounta, David Wiesche & German Neubaum
(WISNA Professors ForBild)

Academic speed dating

With the academic speed dating we want to connect interested scientists across disciplines. Here are the conditions for participation:

- Please come prepared to describe your research in 2 minutes or less.
- You present you and your current research with the help of two slides (Affiliation/ Interests/Research Topics/ I can provide.../ I am looking for...)
- After five presentations (=10 minutes) we do a short Q&A session.
- After the workshop we ask you to send us the slides, which we will then pass on to the participants of the workshop for networking purposes.

Workgroup 1

Learning Analytics for Collaborative Contexts

This workgroup will explore the use of computational methods for the analysis of collaborative activities that target content composition, knowledge building and information synthesis with the aim to model learning processes.

Workgroup2

Merging Informal and Formal Learning Contexts

This workgroup will discuss the use of digital technologies - from fitness trackers to social media - for supporting continuous learning inside and outside the classroom.
