1. The University of Duisburg Essen (UDE)

We are a young, innovative university located in the heart of the Ruhr metropolis. We pride ourselves on outstanding research and teaching, think in terms of opportunities rather than limitations and develop ideas with a view to the future. Diversity is an integral part of our culture as we promote potential and are committed to upholding genuine equity in education.

Duisburg campus

Located in the heart of the Ruhr metropolis, the University of Duisburg-Essen (UDE) is one of Germany's youngest universities and also among its strongest in research. The courses range from the humanities, social sciences and educational sciences via economics and business studies all the way to the engineering sciences, computer sciences and natural sciences (including medicine).

UDE embodies responsibility for the future. Our values – openness and internationality, diversity, equal opportunity and sustainability – guide our actions, research, teaching and learning.

UDE's research profile is distinguished by the strategic identification, consistent promotion and systematic advancement of promising, innovative ideas – and this is true of both fundamental and applied research and extends to the transfer of knowledge into industry and society. Our many internal and affiliated institutes also bear witness to this.

The cornerstones of UDE's research profile are the University-wide strategic research areas, which are shaped and advanced by numerous researchers in twelve faculties and fourteen inter-faculty research centres. Cooperative research projects have just as vital a place here as excellent individual research.

With innovative and digitally supported teaching and learning concepts, UDE enables research-based learning from the start. The University offers around 38,000 students from 130 countries a wide range of courses of study, including teacher training.

UDE is considered a paradigm throughout Germany of how equity in education can be implemented at a university with a strong track record in research. Numerous measures and projects are in place to support talented young people and offer them prospects. UDE considers itself a vibrant environment of diversity and openness where students, researchers and staff can realise their potential and willingness to perform.

In a strategic partnership, UDE is affiliated with Ruhr University Bochum (RUB) and TU Dortmund University. Together, they form the University Alliance Ruhr (UA Ruhr) and collaborate closely to achieve excellence in research and teaching together. With more than 110,000 students and almost 14,000 researchers, the UA Ruhr is one of the largest and best-performing academic hubs in Germany. The UA Ruhr's top-level international research on pressing issues of the future has been consolidated under the umbrella of the Research Alliance Ruhr.

In addition, the UDE maintains partnerships with over 100 universities around the globe and is a founding member of the Aurora European university network, which offers cross-border study programmes.

UDE as an employer

Seal of quality from the German Association of University Professors and Lecturers

The University of Duisburg-Essen bears the German Association of University Professors and Lecturers' (DHV) seal of quality for the fair and transparent nature of its appointment proceedings; this seal was first earned in August 2014, with successful re-audits in 2017 and 2022.

Learn more: <https://www.uni-due.de/verwaltung/berufungsmanagement/>

Family-friendliness

UDE systematically promotes and improves the ability of all its members to balance family life with research, work and studying, which it underscored as early as 2010 with its successful participation in the family-friendly university audit (*audit familiengerechte hochschule*). In 2022, UDE joined the *Verein Familie in der Hochschule e.V.* (family in higher education association) and established the UDE-wide *Netzwerk Familie** (family network). This was followed in 2024 by participation in the *North Rhine-Westphalia state programme Vereinbarkeit Beruf & Pflege* (reconciling work and care).

The Diversity Support Center at UDE offers support through the Family Service Office. Its offerings include personalised consultation on topics related to care, its own daycare facilities, flexible caregivers in emergencies and a holiday activity programme.

Learn more: <https://www.uni-due.de/diversity/en/>

Onboarding and Dual Career Service

The Onboarding team within the Appointment Management Department provide advice for getting started at UDE and can connect you with UDE's other consultation services. They also organise the Dual Career Service, which offers career assistance for both you and your partner.

Learn more: https://www.uni-due.de/en/dual_career.php

Coaching and further training

We see ourselves as a university of potential and work to ensure that all UDE members can contribute and develop their talents and abilities. This includes a wide range of opportunities to develop leadership skills along with coaching for line managers.

Learn more: <https://www.uni-due.de/pe/personalentwicklung>

Promoting good health in the workplace

UDE's occupational health management service works to provide a healthy and pleasant work environment as well as a culture of cooperation and trust. Staff at UDE can take advantage of a broad spectrum of in-person and online options to promote good health, comprehensive sport and fitness offerings provided by the University sport services, balanced meals in the canteens for good nutrition on campus, and many other opportunities.

2. Faculty of Engineering

ALL RELEVANT ENGINEERING DISCIPLINES UNDER ONE ROOF

The Faculty of Engineering at the University of Duisburg-Essen provides a unique profile. No-where else in Germany are engineering sciences so close as at the University of Duisburg-Essen. Three departments teach and conduct research under one roof: Civil Engineering, Electrical Engineering and Information Technology and Mechanical and Process Engineering, including Industrial Engineering. Furthermore, the interdepartmental Mobility Transformation Institute (MOTION) was established, in which research and teaching in the field of mobility, automotive engineering and automotive economics is currently carried out by chairs from all departments. As a result, the faculty has an integrated spectrum of engineering disciplines that is unique in Germany and meets all requirements for modern, innovative, and interdisciplinary university education and research in the field of engineering sciences.

With more than 7.300 students – about 44 % of them from foreign countries – the faculty is a strong partner for the regional and cross-regional industry. Graduates of our study programs enjoy a high reputation due to their broad professional competence as well as due to the special interdisciplinary and international orientation of our study programmes. Classical study courses such as mechanical engineering, electrical engineering, metallurgy and metal forming, and civil engineering are complemented by modern interdisciplinary study courses such as nanoengineering, medical engineering, or industrial engineering. In addition, social skills are addressed that are particularly trained through teamwork and interaction with international students. Our integrated international bachelor's and master's degree programme "International Studies in Engineering (ISE)" with 50 % English lectures is attractive due to its global character and versatility not only for international students but also for German speaking students.

We have developed a sustainable support system for our first-year students that ensures a seamless transition from school to university education. They have the opportunity to learn the contents of their studies in small groups within the first three semesters, enabling them to quickly complete the demanding engineering study at a high level. In addition, there are intensive laboratory courses that convey how to use the technologies of the future right from the start.

With an investment volume of more than 60 million Euro for equipment infrastructure, the Faculty of Engineering has excellent opportunities to develop cutting-edge technologies and conduct basic research. With six concluded and four running DFG-Collaborative Research Centers, three running DFG-Research Training Groups as well as six DFG funded Research Units the faculty is the best address in Germany and the international science community for research in the fields of nanotechnology and material sciences. Beside of that the topics

- Energy and Environmental Process Engineering,
- Nanotechnology,
- Combustion Science,
- Mechatronics,
- Automotive Engineering and Management,
- Communication Systems,
- Microelectronics and Medical Technology,
- Information Technology,
- Product Engineering and Materials Technology,

- Civil Engineering,
- Industrial Engineering,
- Logistics

are the focus of research activities.

By focusing on these areas, the faculty has achieved a high international reputation, which is documented by numerous research projects. In addition, there are the affiliated institutes and other associated institutes

- Development Centre for Ship Technology and Transport Systems (DST),
- Institute for Mobile and Satellite Communication (IMST),
- Institute for Energy and Environmental Technology (IUTA),
- IWW Water Center (IWW),
- Center for Fuel Cell Technology (ZBT),
- Fraunhofer Institute for Microelectronic Circuits and Systems (Fraunhofer IMS),
- Gas- und Wärme-Institut (GWI),
- Center of Rotating Equipment (CoRE),

which collaborate closely with the faculty and have an annual total revenue of more than 35 million Euro. The faculty and the affiliated and associated institutes have proven to be excellent partners for complex technological solutions and for the recruitment of excellently trained engineers.

To promote cooperation between the departments and institutes and to increase visibility the faculty has established three research profiles, which are “Tailored Materials”, “Human-Centered Cyber-Physical Systems” and “Energy and Resource Engineering”.

3. Department of Mechanical and Process Engineering

From nanosciences to classical mechanical engineering to autonomous/highly automated vehicles and systems.

Approximately 3,500 students are enrolled in the degree programs of the Department of Mechanical and Process Engineering. The attractive range of subjects covers the "classical" topics of mechanical engineering, enables further interdisciplinary studies in "Industrial Engineering" or "Automotive Engineering & Management" and offers the international study program "International Studies in Engineering". Participations in other interdisciplinary courses round out the program. The fact that the department's offer is also attractive to women is demonstrated by the above-average ratio of female students. It is currently over 16 %. The high attractiveness of the Master's programs in particular is reflected in the steadily growing interest shown by Bachelor's graduates from other universities who are moving to Duisburg from all over Germany.

The work in the Department of Mechanical and Process Engineering is shared by 24 professors in seven institutes - highly motivated scientists, most of whom have only been appointed in the last 10 years.

The Department of Mechanical and Process Engineering of the Faculty of Engineering is well prepared for future technological challenges of the national and international industries. The breadth of subjects represented is also reflected in the diversity of teaching and research interests: energy and process engineering, product engineering and logistics, mechatronics, marine engineering and nanotechnology. The department's own institutes work closely together with four affiliated institutes and emphasize the application-oriented character of engineering research.

The Department of Mechanical and Process Engineering at the University of Duisburg-Essen is excellently positioned both with regard to the increasing competition or cooperation among colleges and universities and for future cooperation with national and international partners from science and industry. Due to the nationally and internationally active industrial companies located in the region, there are also numerous opportunities to tackle and implement application and basic research topics.

4. Information about the open position

We are a young, innovative university located in the heart of the Ruhr metropolis. We pride ourselves on outstanding research and teaching, think in terms of opportunities rather than limitations and develop ideas with a view to the future. Diversity is an integral part of our culture as we promote potential and are committed to upholding genuine equity in education.

The **Faculty of Engineering** at the University of Duisburg-Essen is looking to fill the following position: **University Professor in Data Science in Mechanical Engineering**

Salary band W2 with tenure track to W3 (as defined in the North Rhine-Westphalian regulations for the W salary range (Landesbesoldungsordnung W; LBesO W)) The professorship is to be filled starting as soon as possible. We are seeking a distinguished individual in the field of data science in engineering. The application focus is on the development of data-based methods for automation technology, autonomous systems and mechatronics.

The future research focus areas of this professorship will include aspects of the automation of vehicles, transportation systems and production facilities the modelling and control of complex mechanical systems the development of data-driven assistance systems diagnostics and prognostics for monitoring technical systems

The successful candidate is expected to have independent academic expertise in several of the following research areas: the application of artificial intelligence methods for the model-based description and technological optimisation of complex systems (e.g. vehicle and transportation technology, production systems) data engineering, modelling and simulation, e.g. for control, monitoring and autonomous process management in mechanical engineering or process engineering applied deep learning or reinforcement learning, e.g. in the perception technology of autonomous systems, damage diagnosis or predictive maintenance Leadership experience in research and/or development is desirable. Experience in industrial research or in relevant cooperations with industry focussing on the technological implementation of research results is required. In research, the willingness to network and collaborate with others is expected in order to complement and expand the existing competencies in the Faculty of Engineering. This includes initiating, acquiring and conducting externally-funded collaborative projects through joint applications with partners in the Faculty of Engineering and beyond. In this context, cooperation with the other chairs of the Institute for Mechatronics and Autonomous Systems as well as with Technical Logistics and Mobility is of particular importance. This professorship also integrates ongoing research in robotics. The ability to conduct collaborative research on an international level is required. This professorship is involved in several major research instrumentation units, such as the Test and Management Centre for Autonomous Inland Waterway Vessels (VeLABi) and the Test Centre for Innovative Port and Cargo-handling Technologies (HaFoLa), with equipment including various simulators for vehicle driving and assistance systems at its disposal. The continuation of these activities is expected in the context of the professorship. The successful candidate will develop and teach classes in model and data-based methods in autonomous systems, the fundamentals of autonomous vehicle systems as well as the professorship's research focus areas in the bachelor's and master's programmes offered by the Department of Mechanical and Process Engineering in both German and English. Traditional and data-based modelling methods are

also to be taught.

The future holder of the professorship is also to play an integral role in the expansion of the programme offerings in autonomous systems. Furthermore, the willingness to didactically utilise and integrate virtual and AI-based teaching and learning methods in a suitable manner is desirable. We expect the successful candidate to have published papers in leading peer-reviewed venues and have experience in conducting projects for which they have acquired external funding from competitive schemes themselves, preferably projects funded by the German Research Foundation (DFG) or equivalent, as appropriate to the advertised position. The University of Duisburg-Essen places particular emphasis on teaching quality. Therefore, candidates must outline their didactic approach, also taking the profile of the University of Duisburg-Essen into consideration.

Criteria for appointment are based on Section 36 of the North Rhine-Westphalian Higher Education Act (*Hochschulgesetz NRW*; HG).

The University of Duisburg-Essen aims to promote the diversity of its members (<https://www.uni-due.de/diversity/en/>). It strives to increase the proportion of women in its academic staff and therefore strongly encourages women with relevant qualifications to apply. If two candidates are equally qualified, women will be given preference as stipulated in the Equal Opportunities Act of North Rhine-Westphalia (*Landesgleichstellungsgesetz*; LGG NRW). Applications from qualified candidates with disabilities or equivalent status as defined in Section 2 (3) of Book IX of the German Social Code (*Sozialgesetzbuch*; SGB IX) are encouraged.

Applications should include the usual documents (CV including information on both your academic and professional experience; a list of academic publications; copies of relevant certificates; a description of your research profile and the resulting perspectives for the University of Duisburg-Essen; a teaching and learning concept that takes the University of Duisburg-Essen's profile into account; information on your teaching activities, your involvement in academic self-governance and external funds that you have obtained to date). Please submit your application to the address below by 13 August 2026: Faculty of Engineering dekanat.iw@uni-due.de Please find further information on the position and its affiliations within the University of Duisburg-Essen and the Faculty of Engineering at: <https://www.uni-due.de/iw/en/jobs.php>

5. Legal framework

Universities are state-funded bodies under public law with legal capacity. State funding is based on the university's tasks, the obligations agreed upon in university contracts and the university's performance. They have a global budget and are not subject to individual instructions from the Ministry for Culture and Science of the state of North Rhine-Westphalia.

If the legal requirements are met, professors are appointed as permanent civil servants as a rule. Professors can also be appointed on the basis of an employment contract under private law.

When awarding a junior professorship, it is to be noted that individuals who already meet the hiring requirements for a university professorship due to having completed a habilitation or another reason cannot be considered.

6. Salary

The salary of university teaching staff is stipulated by the North Rhine-Westphalian system for the remuneration of civil servants. These staff members fall under the W salary range, which contains the bands W1, W2 and W3.

Basic salaries can be supplemented with (performance) bonuses in bands W2 and W3. These performance-based salary components can be awarded

- as a result of appointment and retention negotiations (appointment and retention bonuses),
- for special achievements in research, teaching, art, further education and supporting early career researchers (special achievement bonuses),
- for assuming functional or special responsibilities as part of the University's self-governance or University management (functional bonuses).

In certain circumstances, so-called teaching and research bonuses may be paid from private third-party funds.

During appointment and retention negotiations, performance bonuses can also be agreed for a fixed period of time if they are linked to target and performance agreements.

Appointment bonuses are to be negotiated on an individual basis with the Rector of the University of Duisburg-Essen as part of appointment negotiations.

Please find a table showing the current remuneration (in North Rhine-Westphalia) for the salary bands W1, W2 and W3 at:

- https://www.finanzverwaltung.nrw.de/sites/default/files/asset/document/grundgehaelter_a_b_r_und_w.pdf

You can find information on the W salary range (in North Rhine-Westphalia) and the legal foundations for it on the following webpages:
