

## **Invited Lectures 2013**

### **January 24**

How to restore proliferation in BRCA2-deleted cells

Dr. Madalena Tarsounas

Gray Institute for Radiation Oncology and Biology,  
University of Oxford

### **April 18**

Targeting endothelial metabolism: principles and strategies

Prof. Dr. Peter Carmeliet

Laboratory of Angiogenesis and Neurovascular Link (Vesalius Research Center),  
Belgien

### **May 17**

Radiation pathology: From Thorotrast to the Fukushima Nuclear Power Plant  
Accident

Prof. Dr. Manabu Fukumoto

Department of Pathology, Institute of Development, Aging and Cancer, Tohoku  
University, Sendai, Miyagi, Japan

### **May 28**

CtIP phosphorylation: a paradigm for the regulation of DNA double-strand break  
processing

Prof. Dr. Alessandro Sartori

Institute of Molecular Cancer Research,  
University of Zurich

### **June 18**

Hypoxia and radiation resistance: pathophysiology and clinical implications

[Prof. Dr. Jürgen Dunst](#)

Department of Radiotherapy,  
University of Lübeck

### **November 5**

Topic will be announced

Prof. Dr. Andreas Trumpp

German Cancer Research Center,  
Heidelberg
