

## Invited Lectures 2018

### **November 22, 12:00-13:00 Lecture and Lunch**

DNA Replication & Genome Integrity Group

[Dr. Boris Pfander](#)

Max-Planck Institute of Biochemistry, Martinsried

### **May 15**

Modulation of GBM radiosensitivity by senescent endothelial cells

Dr. François Paris

Head of radiobiology of vascular and angiogenic laboratory,

University Nantes

### **May 15**

Tumour Microenvironmental Factors, Implications in Radiotherapy

Dr. Brita Singers Sørensen

Department of Clinical Medicine

Aarhus University, Denmark

### **February 20**

Radiation Effects on Cognition in Cancer Therapy with X-rays, Protons or Carbon Beams

Prof. Dr. Francis Cucinotta

Department of Health Physics and Diagnostic Sciences,

University of Nevada, Las Vegas

### **January 23**

Development of gene expression signatures as novel diagnostic tools for early prediction of the acute radiation syndrome

Dr. Matthias Port

[Director, Bundeswehr Institute of Radiobiology, München](#)

### **January 9**

A role for telomeres in UV-induced skin cancer

Prof. Dr. rer. nat. Petra Boukamp

[IUF – Leibniz Research Institute for Environmental Medicine IUF – Düsseldorf](#)

[DKFZ Heidelberg](#)
