

Invited Lectures 2019

July 16

Pre-clinical and clinical development of novel radiation sensitizers

[Prof. Geoffrey Higgins](#)

University of Oxford, Dep. of Oncology

Tumour Radiosensitivity Research Group

July 9

Alternative end joining of DNA breaks: the lesser of two evils

[Prof. Marcel Tijsterman](#)

Leiden University Medical Center (LUMC), Dep. Human Genetics and

Professor for Genome Engineering at the Institute of Biology Leiden (IBL)

June 18

Integrative Pharmacogenomic Profiling Reveals Novel Therapeutic Vulnerabilities In Brain Tumors

[Dr. Marc Remke](#)

Junior Scientist and International Researcher Center (JUNO)

Heinrich-Heine-Universität Düsseldorf

Research group leader within the German Cancer Consortium (DKTK)

Pediatric Neuro-Oncogenomics

May 7

Targeting the Therapeutic Ratio in cancers

[Prof. Marc Vooijs](#)

Maastricht University, Department of radiotherapy

February 19

The nucleoshuttling of the ATM protein: applications to defence, health and environment

[Prof. Dr. Nicolas Foray](#)

Cancer Research Center Lyon

February 5

Normal tissue responses after low doses of ionizing radiation: Implications for Radiation Oncology

[Prof. Dr. Claudia Rübe](#)

Head of Laboratory for Molecular Radiooncology

Clinic for Radiotherapy and Radiooncology

University Hospital Saarland
