

Invited Lectures 2020

November 17

Dissecting the role of Ubiquilins in DNA double-strand break repair

[Dr. med. Ron Jachimowicz](#)

Max Planck Research Group Leader

Resident Physician at the Clinic I of Internal Medicine,
Department of Hematology, Oncology and Infectious Diseases,
University Hospital Cologne

November 3

Sequences that stall replication

[Dr. Julian Sale](#)

Cancer Research Center

MRC Laboratory of Molecular Biology, Cambridge

October 6

Oncometabolites, DNA repair, and cancer therapy

[Prof. Dr. Peter Glazer](#)

Yale School of Medicine, New Haven

Chair of the Department of Therapeutic Radiology

Postponed

July 28

Targeting lipid metabolism in cancer

[Prof. Dr. Almut Schulze](#)

German Cancer Research Center, Heidelberg

Division Tumour Metabolism and Microenvironment

June 16

Modeling tumor heterogeneity towards personalized cancer medicine

[Prof. Nataly Kravchenko-Balasha](#)

Laboratory of Biophysics and Cancer Research

Hebrew University - Hadassah Medical Campus, Jerusalem

January 28

The role of tumor cell derived extracellular vesicles for metastasis

[Prof. Dr. Elke Pogge von Strandmann](#)

Philipps University Marburg,

Center for Tumor Biology and Immunology
