

## Non-Equilibrium Dynamics of Condensed Matter in the Time Domain

Non-equilibrium states can be created in condensed matter through ultrashort pulsed external stimuli such as light, pressure, electrical voltage or particles.

This Collaborative Research Centre aims to achieve a material specific, microscopic understanding of such non-equilibrium states.

To this end, new tools in experimental and theoretical physics will be developed to describe the time evolution from the moment of the stimulus to a state close to equilibrium in time and space.

**Ph. D. Retreat 2018**  
**CRC 1242**  
**IRTG**

**Meinerzhagen**  
**June 11 - 13, 2018**

## Monday, June 11, 2018

- 10:00 Arrival
- 10:30 Opening  
Katharina Tugend  
Workshop Science Communication
- 12:00 Lunch
- 13:00 Pia Eickelmann  
Phillip Kapitza  
Kira Kolpatzeck
- 14:15 Coffee Break
- 14:45 Organizational Meeting  
Eric Kleinherbers  
Vijaya Begum
- 16:00 Coffee Break
- 16:30 Bernd Hafke  
Tobias Witte
- 17:30 Flash Talks 1
- 18:00 Dinner
- 19:00 Poster Session 1

## Tuesday, June 12, 2018

- 9:00 Christian Brand  
Pawel Kucharczyk
- 10:15 Coffee Break
- 10:45 David Janoschka  
Pascal Dreher  
Fabian Brinks
- 12:00 Lunch
- 13:00 Outing  
Burg Altena
- 17:30 Flash Talks 2
- 18:00 Dinner
- 19:00 Poster Session 2

## Wednesday, June 13, 2018

- 9:30 Valentina Vasilov  
Workshop Good Scientific Practice
- 12:00 Lunch
- 13:00 Retreat Closing
