

XCMG is one of the largest construction machinery manufacturers worldwide. Our excavators, cranes, earthmoving and road construction machines are making a big difference in the construction, mining and energy industries. The XCMG European Research Center in Krefeld plays an important role to develop key technologies in the fields of electronics and software, hydraulics, drive and control systems.

As part of a strong team of enthusiastic engineers, you will help us to achieve our goal - to create the most efficient, environmentally sustainable, functional and ergonomic construction machinery. In order to achieve this, we offer our employees a great amount of freedom, direct communication channels and many opportunities to make themselves grow: Because innovation lives from ideas. Get your ideas on track with us - as

Trainees/ Student Helper (m/f/d) for Aerial Work Platforms

Location: Krefeld

This is where you create great success

- Supporting our Aerial Work Platforms team in the design and operation of test benches.
- Market analysis and research, interpretation, creation and translation of technical documentation in different languages.
- Supporting the team for the communication between the company and customers.

You can score points with this:

- Ongoing technical studies (university or college) specialising in mechanical engineering, automation, mechatronics, linguistic or similar
- Motivated, trustworthy, work independently, initiative and have strong communication skills
- Chinese native speaker, good knowledge of German and English
- Good knowledge of another language such as French, Spanish or Italian is a credit

This is what you can count on at XCMG:

- A creative and dynamic working environment characterized by innovation.
- An open working atmosphere and motivated colleagues with whom you will work on challenging tasks relating to Aerial Work Platforms.
- Involvement in the current projects of our international teams.
- Professional support for personal development.
- Uncomplicated communication channels and scope for your ideas.
- Flexible working hours for a good work-life balance.
