

About us

We are EP Power Minerals GmbH, based in Dinslaken, we see ourselves as a European competence leader in the management of power plant by-products and blasting abrasives as well as industrial waste. With our subsidiaries and our internationally growing network, we have been a leading service provider for industries and the construction sector for more than 40 years, supplying them with high-quality construction materials, blasting agents and industrial materials. Our products such as fly ash, reduces the carbon footprint and invest in diverse future projects with alternative material sources to further develop the long-term sustainability of our company. We also specialise in the responsible disposal of industrial waste and the production of building materials from waste. With over 200 employees, we were able to generate a turnover of 147 million euros in 2022.

For our location in Dinslaken we are looking for the following person for the headquarters with immediate effect
