

## Uniper Trainee Program April 2022 - Commercial Operations (f/m/d)

[Apply Now!](#)

Do you want to be part of [#unipersnextgeneration](#) and shape the energy world of tomorrow with us?

### What awaits you?

As a Graduate in the Trainee Program, you have the opportunity to get to know different divisions and to gain valuable experience. The 18- / 24-month program based in Germany, with a combination of pre-defined and flexible stations, also gives you the opportunity to gain international experience and work in various business units. The program offers an in-depth insight into our business and enables you to explore and develop your competencies. You will have the chance to bring-in and enhance your social and collaborative skills. You will get personal mentoring and a buddy from day one to ensure you have the best possible foundation for the next step in your career at Uniper.

### What will you focus on?

- You will develop a deep understanding of Uniper's international business and corporate environment
- You will learn from experts from many different fields, bring in your own ideas and work on your own projects in collaboration with various stakeholders
- You will develop your technical, operational and interpersonal skills
- You will start your journey by supporting the Process Analytics Workstream as part of the Digital Transformation Program of Commercial Operations
- You will help create a framework to monitor the performance processes that settle around 1 million transactions of > 150 billion € each year across all commodities in scope of Uniper's current business model
- Along with hands on learning how to create value by applying state of the art process monitoring and automation technology, you will get the opportunity to create your own network within Uniper's digital transformation community helping you shaping YOUR future within Uniper

### What should you bring along?

- A successfully completed degree focusing on data science and/or business administration
- Relevant internships and/or working student placements
- Knowledge of relevant solution concepts and/or applicable technology (e.g. process mining, process monitoring, process automation technology)
- Intercultural experience is crucial, experience abroad is a plus
- Curiosity and openness towards working in an intercultural environment
- Strong sense of responsibility and proactivity with the ability to think independently and solution-oriented
- Strong willingness to hands-on practice intellectual curiosity while striving for continuous improvement
- Advanced interpersonal communication skills
- Proficiency in English language, both orally and in writing; German language skills as a plus
