

SFB TRR 60

Scientific Writing

Inhalt:

This workshop focuses on (1) mistakes that are commonly made by non-native English speakers in scientific writing, (2) the proper construction of paragraphs and sentences in English scientific writing and (3) a how-to approach to writing a paper explaining many common pit-falls and things you should know before you start.

The seminar specifically addresses topics, such as how to choose the strength of the adjective or adverb when presenting sensitive results, the importance of good English paragraph structuring to clearly present scientific ideas and structure papers and grants, how to use attention-getting words (therefore, however, etc.) correctly and not overuse them, and commonly misused/misunderstood English words and phrases.

Questions are encouraged throughout the workshop. It is designed to be interactive and flexible, and to meet the experience level and needs of scientists at the beginning of their research careers.

Coach: Dr. Kathy Astrahantseff

Time: Friday, 30 January 2015 – 13.00 Uhr - 18.00 Uhr

Room: Lehr-Lern-Zentrum, seminar room 1, ground floor, UK Essen
Virchowstraße 163a

Language: English
