

ORGANISATION

The series showcases the broad range of disciplines involved in metropolitan research in the **University Alliance Ruhr (UAR)**: Experts from all three universities as well as external guests give insights into their current work. While the main focus lies on the **Ruhr Region**, experiences from other metropolitan regions are included in a comparative approach.

Since 2013, the **RUHR LECTURE** has been organized by the Institute of Geography at **Ruhr-University Bochum** and the Faculty of Spatial Planning at **TU Dortmund University**.

They are now joined by the Joint Center "Urban Systems" at the **University of Duisburg-Essen**.

As of the winter term 2016/17, the **RUHR LECTURE** is organized by the newly established competence field "**Metropolitan Research**" of the UAR.

The series is part of the activities of the **SURF**-Network Ruhr (Urban and Regional Research Network Ruhr, www.surf-ruhr.de).
