

**Schedule of Lectures**  
**„Urban Culture, Society and Space (UCSS)“**  
**and**  
**“Sustainable Urban Development**  
**(SUD)”**(formerly Technologies)

winter term 2018/19

for students of the **third** semester

**Important:**

**Please register your exams by the lecturers.**

**Please consult for current information always the given LSF-Links.**

**All listed courses are accepted in both Master’s Programmes  
(in Modules 8A and 8B).**

**Orange marked courses are (more) recommended for UCSS.**

**Green marked courses are (more)recommended for SUD**

**Blue marked courses are recommended for both programs.**

All listed courses are accepted in both Master's Programmes (in modules 8A and 8B).

Orange marked courses are (more) recommended for UCCS.

Green marked courses are (more) recommended for SUD.

Blue marked courses are recommended for both programs.

Overview – Third Semester WS 2018/19

Master's Programmes "Urban Systems"

<b>Sprache</b>	Deutsch
<b>Description/ Kommentar</b>	<p>Das kulturelle Leben einer Stadt zeichnet sich durch eine komplexe Vielzahl von Akteuren aus. Diese stehen in unterschiedlichen Allianzen und Konkurrenzen zueinander, arbeiten oft auch ohne voneinander zu wissen oder miteinander zu kooperieren. In Kulturpolitik und Kulturmanagement werden „Kooperationen“ und „Netzwerke“ sehr oft als wesentliche Gestaltungselemente benannt. Doch selten wird vertieft reflektiert, welcher Aufwand, welche Prinzipien und Methoden für den Erfolg in der Ausgestaltung von Allianzen notwendig und sinnvoll sind. In jedem Fall sollte bedacht werden, welche Wirkungen in der Kulturszene und in Form von Kulturangeboten an die Stadtbewohner und -besucher erzielt werden sollen. Hauptaufgabe des Netzwerkmanagements ist es, die Prozesse innerhalb eines Netzwerks mit Feingefühl und Weitblick und im Bewusstsein von erfahrungsbasierten Erfolgs- und Effizienzfaktoren zu steuern. Im Seminar werden u.a. folgende Instrumente einer gelungenen Cultural Governance behandelt: Leitbildprozesse, Wissenstransfer, Kommunikationskampagnen, Moderation von Organisations- und Teamentwicklungen, Einbeziehung externer Berater. Zu den Fallbeispielen gehört das Multiprojektmanagement der Kulturhauptstadt Europas RUHR.2010, für deren Erfolg gut funktionierende Kooperationen, Partnerschaften und Netzwerke sehr wesentlich und letztlich ein elementarer Bestandteil des Gesamtkonzepts waren.</p>

<b>Description/ Kommentar</b>	In diesem Seminar stehen die (Großstadt)Kommune und das Handeln der Kommune im Mittelpunkt des Interesseseses. Hierbei werden die Möglichkeiten und die Handlungsspielräume der kommunalen Akteure bei Entscheidungsprozessen, das Zusammenspiel der Gesetzesgrundlagen und vorhandenen Instrumente sowie die Legitimation bürgerschaftlichen Engagements unter den aktuellen Herausforderungen am Bsp. des kommunalen Umweltschutzes (incl. der damit zusammenhängenden Aspekte wie Luft, Lärm, Boden, Gewässer, Natur und Landschaft) thematisiert. Neben der Analyse und der Bewertung auch störender Einflüsse, soll den Studierenden das kommunale Instrumentarium zur Umsetzung der spezifischen Umweltqualitätsziele vorgestellt und nähergebracht werden. Dabei soll sich auch mit den Hindernissen und Problemen beschäftigt werden, die permanent den politischen Diskurs begleiten.

<b>Description</b>	<p>Preliminary Description: In recent years, urban health has been gaining importance due to the New Urban Agenda and Sustainable Development Goals (SDGs) (UN 2015, 2016), which have health and well-being high on their agenda. Since health is created and lived by people within the settings of their everyday life (WHO 1986), from a public health perspective, it is crucial to focus on changing the setting/living conditions instead of just stimulating behavioral changes.</p> <p>New communication technologies have opened up an extraordinary range of avenues for influencing health on the individual, social and environmental level and expanding the range of tools that planners can use to develop interventions. Students will develop a concept that could be a starting point for developing a smart tool which can be used for a participatory assessment of urban health (further information will follow in the LSF).</p>
<b>Registration for Participation</b>	<b>If you are interested in participating, please send an email until November, 30th, 2018 to Robynne Sutcliffe <a href="mailto:Robynne.Sutcliffe@uk-essen.de">Robynne.Sutcliffe@uk-essen.de</a></b>

<b>Description/ Kommentar</b>	This three-day seminar/workshop combines phases of theoretical input, simulation, discussion and reflection on key topics related to effective cross-cultural interaction in an international professional context. Definitions of culture, cross-cultural competence and major theoretical constructs are brought to life in case studies, cultural briefings, pragmatic communication exercises, virtual elements and interactive simulations.

<b>Description</b>	<p>The seminar examines how urban policy may foster the renewal of different kinds of urban neighbourhood. These may comprise, for example,</p> <ul style="list-style-type: none"> <li>▪ parts of the main or sub-centres of cities that experience an economic downturn,</li> <li>▪ other quarters in the central areas of cities, where gentrification is evident,</li> <li>▪ deprived neighbourhoods of inner cities,</li> <li>▪ brownfield sites envisaged for conversion, or</li> <li>▪ residential areas facing a declining population.</li> </ul> <p>We will review what mechanisms are responsible for segregation, which challenges arise for policy from current economic and demographic change and what has been achieved by selected policy measures.</p> <p>The course will start with an opening session, in which the precise outline of the seminar will be discussed and topics will be assigned. The opening session will include a mini-lecture (around 120 minutes) that introduces and refreshes the background on basic relevant issues concerning urban economic theory, segregation and urban policy.</p> <p>The main part of the course will comprise a two-day block seminar, during which current topics and methodical approaches in urban science and planning will be in the focus. We will discuss, in particular, what location characteristics can be held responsible for intra-urban differentials and what scope there is for regional and urban policy to overcome undesirable characteristics that may affect specific neighbourhoods. Selected policy measures will be examined in the form of case studies, which will be prepared by participants and discussed during the two-day seminar. The practical relevance of the seminar topics will be demonstrated and reviewed further during a one-day excursion.</p> <p>In the course, students will</p> <ul style="list-style-type: none"> <li>▪ -refresh and become more acquainted with selected topics from urban economics,</li> <li>▪ -acquire enhanced knowledge about the practical relevance of urban research,</li> <li>▪ -become acquainted with empirical methods (data acquisition and analysis),</li> <li>▪ -prepare a text and presentation in individual or group work (about 5 pages text and PowerPoint presentation),</li> <li>▪ -present a topic during the seminar,</li> <li>▪ -and defend their reasoning during a discussion.</li> </ul>
