

Who are we?

The AquaSmarTech (AST) Group is a corporation founded in 2015 as DVGW university group of international ISE master program "Management and Technology of Water and Waste Water" ([MTW³](#)) at the University of Duisburg Essen.

What are we doing?

- Direct link between the chair "Mechanical Process Engineering / Water Technology and MTW³ - students
- Organizing excursions and training courses
- Organizing lectures, workshops and practical projects
- Organizing exhibitions visits
- Making contact with the professional world
- Cooperation with the DVGW and other university groups

Who is DVGW?

The DVGW has been working for the gas and water industry as an independent and unbiased technical-scientific association since 1859.

The DVGW defined the following prime objectives:

- Safe technology and hygiene
- Economical optimization of the gas and water supply technology
- Protection of resources and the environment
- Quality assurance, quality control, and quality management
