

Vorlesungsankündigung SS 2024

"Metrology in Chemistry – From Data Evaluation to Traceability in Chemical Analysis"

Main content:

- Introduction to metrology and the total analytical process
- The International System of units (SI)
- Concept of metrological traceability and its realisation in chemical measurements
- How to express analytical results
- Concepts, approaches and examples for estimating measurement uncertainty
- Principles of analytical quality assurance and quality control incl. ISO/IEC 17025
- Modern validation of analytical procedures
- Proficiency testing of laboratories
- Reference materials
- The European measurement infrastructure

Place: Universität Duisburg-Essen, Standort Essen, Raum T03 R04 D10

Time: **11.04.2024 & 18.04.2024 & 25.04.2024 & 02.05.2024**
14:00 – 18:00 h

Prof. Dr. Hendrik Emons

Participants will receive a certificate and 2 Credit Points after successfully passing a written test on 02nd May 2024
