

B.Sc. & M.Sc. Projects
in WS 23/24 at
**Institute of Medical
Technology Systems**

Kick-off meeting

Wednesday 18.10.2023
at 14:00

Target Groups for Bachelor Projects

- all Students from B.Sc. Medizintechnik
- all students in the ISE program
- all students from B.Sc. Elektro- and Informationstechnik

B.Sc. MedT (PO 16/19)
-mandatory-

Workload:
5/6 ECTS
(150h/ 180h)

B.Sc. ISE (PO 16/19)
-mandatory-

Workload:
6 ECTS
(180 h)

B.Sc. EIT (PO 12/19)
-mandatory-

Workload:
7/9 ECTS
(210h/ 270 h)

**All students have to write a report and to give a final presentation
attendance at tutorials, seminars and project meetings is mandatory**

Target Groups for Master Projects

- all students in the ISE program
- all students from M.Sc. Elektro- and Informationstechnik

M.Sc. ISE (PO 15/PO19)

-mandatory-

Workload:

6 ECTS

(180h)

M.Sc. EIT (TI/ES) (PO 13/PO19)

-mandatory-

Workload:

8 ECTS

(240 h)

**All students have to write a report and to give a final presentation
attendance at tutorials, seminars and project meetings is mandatory**

- Teams consist of 2-5 Students
- Project work consists of
 - Regular meetings
 - Presentations of intermediate results
 - Final report
 - Final presentation
- Projects are to be completed during lecturing period
- Projects need to be registered, with fixed deadline for submissions

Topic 1: 3D-Druck in der Medizintechnik

Bachelor Project

Master Project

Bachelor-Thesis

Master-Thesis

Wir wollen Studierenden die Möglichkeit bieten, ihre theoretischen Kenntnisse in der Medizintechnikpraxis anzuwenden und gleichzeitig wertvolle Einblicke in den Bereich des 3D-Drucks zu gewinnen.

Hauptziele:

- Erarbeitung einer umfassenden theoretischen Grundlage, die Hardware und Software des 3D-Druckers einschließt.
- Praktischer Versuch, bei dem der 3D-Drucker zur Herstellung medizintechnischer Objekte oder Prototypen genutzt wird.

Bachelor Project

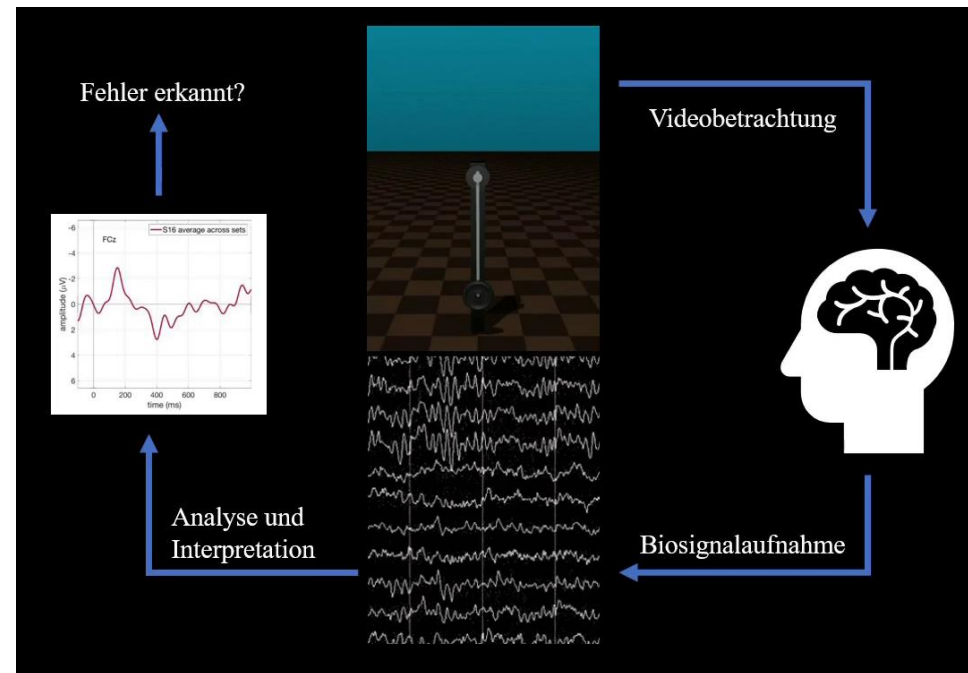

Master Project

Bachelor Thesis

Master Thesis

Erforschung der Fehlerverarbeitungsmechanismen des Gehirns

- Einarbeitung in neurophysiologische Grundlagen
- Durchführung von Probandenexperimenten zur Datenaufnahme
- Analyse der gewonnenen EEG-Signale
- Entwicklung von KI Modellen zur Klassifizierung der EEG-Signale

Topic 3: Robotics Project on TurtleBot 4

Bachelor Project

Master Project

~~Bachelor Thesis~~

~~Master Thesis~~

Looking for motivated students interested in programming and implementing robotics algorithms on a mobile robot called TurtleBot 4.

Project Topics:

- Designing a user interface for interacting with the robot
- Making the robot run autonomously (can choose any 1/more)
 - Obstacle Avoidance
 - Mapping
 - Localisation
 - Navigation

Skills Developed:

- C++ / Python
- Working with ROS2
- Interfacing with Raspberry Pi minicomputer
- Chance to extend the project into Thesis

Topic 4: Ansteuerung einer aktiven Orthese basierend auf der Messung von EMG-Signalen

Bachelor Project

Master Project

Bachelor Thesis

Master Thesis

Ziel des Projektes ist die **Implementierung** und **Weiterentwicklung** einer **EMG** basierten Ansteuerung einer **aktiven Orthese**.

Das Projekt **umfasst/behandelt** die folgenden **Thematiken**:

- **Unterstützung** von Armbewegungen durch **aktive Orthese**
- Ansteuerung durch **Erkennung des Beginns (Onset) der Muskelaktivität** (EMG-Signale) in Echtzeit
- **Implementierung** einer grundlegenden **EMG basierten** Steuerung
- Sinnvolle **Erweiterungen: Visualisierung** der Daten/Events

Topic 4: Control of an active orthosis based on the measurement of EMG signals

Bachelor Project

Master Project

Bachelor Thesis

Master Thesis

The aim of the project is the **implementation** and further **development** of an **EMG**-based control of an **active orthosis**.

The project **includes/addresses** the following **topics**:

- **Support** of arm movements **using** an **active orthosis**
- Control by **detecting** the **onset** of **muscle activity** (EMG signals) in real time
- **Implementation** of a basic EMG based control system
- Useful **extensions**: **Visualization** of data/events

Next steps

- Fill out the application form:

<https://www.survio.com/survey/d/Z8V/2023>

until Friday, October 27th, 9:00!

- You will be informed about acceptance and/or additional meetings on Monday/Tuesday October 30th, 31st.
- Registration for projects until: Friday, November 3rd
- Date of project submission: Friday, February 2nd, 2024
