

ABOUT THE PROGRAMME

The Spring School for Young Researchers is a qualification programme addressing doctoral candidates and postdoctoral researchers at the University of Duisburg-Essen.

Successful academic careers require not only outstanding research results and a deep level of expertise in the respective academic fields, but also key interdisciplinary qualifications. The Spring School supports young researchers with training of these key competencies, which are essential in both the academic and non-academic environment. It aims at strengthening the participants' self-confidence and coping skills, thus enabling them to better communicate their achievements within the academic community and to strategically develop their own career paths.

All six workshops will be held in English, aiming at cultivating and raising awareness for intercultural and interdisciplinary issues.
