

Professor Ian Curran is the Assistant Director of Education and Professional Standards at the General Medical Council, the independent regulator of medical practice in the United Kingdom. He leads policy, regulatory and quality assurance work in postgraduate medical education and training.

He previously worked at Barts Health NHS Trust where he was a consultant anaesthetist with a special interest in chronic pain management. He was Clinical Academic Group Director of Education & Workforce at Barts, Senior Examiner for Medical Finals at Barts School of Medicine and Dentistry and Professor of Innovation and Excellence in Healthcare Education at Queen Mary University of London.

Previously Professor Curran was Associate Dean and then Postgraduate Dean of Educational Excellence and Head of Innovation in London from 2007-13 where he led London's multi-award winning Simulation and Technology enhanced Learning Initiative (STeLI). He has championed patient safety and human factors training for over 15 years and was principal author of the National Quality Board Concordat for Human Factors in Healthcare. He has been clinical adviser to the Department of Health England, NHS England and NHS Health Education England as well as advising a wide range of national and international societies, agencies and governments.

His academic interests include faculty development, policy development, system regulation, doctors in difficulty, human factors, patient safety, quality improvement, simulation, technology-enhanced learning, team training, leadership development, transformational leadership and disruptive innovation.
