

Neurophysiologisches Seminar Sommersemester 2018

**Alle Veranstaltungen finden am Donnerstag von 17.15 – 18.45 Uhr
im Konferenzraum 2b, 2. Etage, im Medizinischen Zentrum statt.**

- 26.04.18** **Dr. Britt Hoffland** (Dept. of Neurology, Radboud University Medical Center, Nijmegen, NL): *„Investigating the role of the cerebellum in dystonia; insights from various forms of motor learning.“*
- 17.05.18** **Dr. Jennifer Faber** (Klinik und Poliklinik für Neurologie Universitätsklinikum Bonn): *„ESMI - European Spinocerebellar Ataxia Type 3/Machado-Joseph Disease Initiative. A prospective multicenter study of SCA3 to set up a trial ready cohort.“*
- 24.5.18** **Dr. Britta Hüning** (Klinik für Kinderheilkunde I, Neonatologie, Uniklinikum Essen): *„Preterm birth and the developing brain.“*
- 7.6.18** **Dr. Imes Dogan** (JARA Brain, Dept. of Neurology RWTH Aachen University): *„Spinal cord and brain MRI in Friedreich ataxia.“*
- 14.06.18** **Dr. Peter Praamstra** (Dept. of Neurology, Donders Institute for Brain, Cognition & Behaviour, Nijmegen, NL): *„The neurophysiology of cueing in Parkinson’s disease“*
- 28.06.18** **Thomas Hulst** (Dept. of Neurology, Uniklinikum Essen): *„Retention of motor learning is affected by differences in training paradigms.“*
- 12.07.18** **Dr. Joseph Galea** (School of Psychology, University of Birmingham, GB): *„The effects of cerebellar tDCS on visuomotor adaptation: past, present and is there a future?“*
- 19.07.18** **Dr. Diane Ruge** (IfADo, Dortmund): *„Deep and non invasive brain stimulation for therapeutic modulation of motor memories.“*
